by Plant Fencing

“A secure, strong combination enclosed pitch solution.”

DUALTECH[®] Panel Systems by Plant Fencing

Unique to Plant Fencing, this twin wire system is based upon the standard 200mm x 50mm mesh design providing excellent strength and rigidity. The configuration of this sports fencing system provides a good balance between rigidity and impact resistance. The wires are galvanised before the product is manufactured so eliminating the barbs and sharp edges that are typical of hot-dipped galvanised products.

DUALTECH[®] sports fencing is ideal for applications where rigidity and impact resistance are essential such as ball-courts and enclosed football pitches, often used behind spectator areas as secondary safety perimeter.

The system comes in a range of heights from 1m up to 6m with galvanised and polyester powder coated options to any RAL colour.

Product Information

The DUALTECH[®] system is an 868 system, with a 6mm vertical wire is sandwiched between two 8mm horizontal wires. Aperture size: 200mm x 50mm Post sizes vary dependant on height, for example, the 3.0m high system is fixed onto 80mm x 40mm x 3mm box section posts and systems that are 4m or above are fixed onto 100mm x 50mm x 3mm box section.

Standard stock colours are Green Ral 6005 and Black Ral 9005. Other colours are an optional extra.
