

“A perfect balance between rigidity and impact resistance”

DUALTECH REBOUND® Panel Systems

Unique to Plant Fencing, this twin wire system is based upon the standard 200mm x 50mm mesh design but with two 8mm horizontal wires either side of the 6mm vertical wire, providing excellent strength and rigidity. The configuration of this sports fencing system provides a good balance between rigidity and impact resistance. The wires are galvanised before the product is manufactured so eliminating the barbs and sharp edges that are typical of hot-dipped galvanised products.

DUALTECH REBOUND® sports fencing has been created to provide near perfect rebound qualities, often used on the lower 1.2m of fencing.

The system comes in a range of heights from 1m up to 6m with galvanised and polyester powder coated options to any RAL colour.

Product Information

The DUALTECH REBOUND® system by Plant Fencing comprises the standard twin wire with the lower 1.2m of the panel formed using the 868 system with a 55mm x 60mm aperture. Post sizes vary dependant on height, for example, the 3.0m high system is fixed onto 80mm x 40mm x 3mm box section posts and systems that are 4m or above are fixed onto 100mm x 50mm x 3mm box section.

Standard stock colours are Green Ral 6005 and Black Ral 9005. Other colours are an optional extra.
