Subject: Planning Application 2019/11137/P. CAAC response

Dear Matthias

There seems to be some problem in sending this consultation response through the usual CAAC system so I have cut and pasted the form and here it is:

<i>Advisory Committee</i>	
<i>Application ref</i>	2019/1137/P
<i>Address</i>	18 Roderick Road London NW3 2NL
<i>Planning Officer</i>	Matthias Gentet
<i>Comments by</i>	28 Apr 2019
<i>Proposal</i>	Addition of a conservatory with detachable transparent sides atop existing rear 2nd floor extension to dwelling house (Class C3).
<i>Objection</i>	Yes
<i>Observations</i>	This scheme would be perceived as a bulky addition to the existing 2nd floor rear flat roof and is contrary to the CA appraisal. The "invisible" look of the proposal on the application drawings is not a realistic representation of the eventual result of such an intervention.
