FAO John Diver

Thank you for allowing me to comment on planning application 2019/1721/P which relates to the removal of three existing lamp posts and the installation of seven lamp posts around the rear forecourt of the University building.

I have no objections to proposal but have the following comments to make.

**Comments**

- All lights proposed to meet BS 5489-1:2013.
- Consideration will be required to make sure that the new lighting does not come into conflict with any trees or landscaping that may already be present. Trees may restrict the performance of street lighting by blocking light or causing damage through collision with branches and really should not be located within five metres of a lighting source. Account must also be taken of the effects of seasonal variation on the trees foliage.
- 'Secured by Design' certainly encourages the, wherever possible, the use of the most environmentally friendly light sources. The use of good quality LED lighting is favoured.

If the applicant wishes any further help or advice then I will be more than happy to be contacted.

Kind regards

Jim
