| 2019/1156/P            | Hampstead CAAC          | 15/04/2019 23:04:13 | OBJ             | HCAAC does not recommend consent for rooflights on front elevations which we believe is contrary to policy, certainly harmful to the character of houses also ref. the CA Statement. Rooflights are powerful sources of daylight but also of light pollution which it seems policy may not be able to control. Residents mainly leave such sources unmasked at night. The internal planning may need to be re-assessed for rear-located rooflights to satisfy requirements. |
