Informatives:

- 1 Reasons for granting permission.

The proposed exterior works include the replacement of doors at ground level, replacement windows at first and second floor, replacement velux rooflights at third floor, new window on the rear at second floor, rear door at third floor to be infilled, and the relocation of the rainwater drain pipe. The alterations are considered appropriate in terms of design and materials to the character and scale of the building. The revised proposal is considered to have more of an industrial character and appears appropriate to the mews setting. Overall the proposed alterations, in terms of design, location and materials are considered acceptable and will preserve and enhance the appearance of the host building and the character of the mews and Charlotte Street Conservation Area.

Given the minor nature of proposed works they are not considered to harm the amenity of any adjoining residential occupiers in terms of outlook, privacy or light spill.

No objections have been received as a result of the statutory consultation. The site's planning history has been taken into account when coming to this decision.

Considerable importance and weight has been attached to the harm and special attention has been paid to the desirability of preserving or enhancing the character or appearance of the conservation area, under s.72 of the Listed Buildings and Conservation Areas Act 1990 as amended by the Enterprise and Regulatory Reform Act (ERR) 2013.

As such, the proposed development is in general accordance with policies A1, D1 and D2 of the London Borough of Camden Local Plan 2017. The proposed development also accords with The London Plan 2016 and the National Planning Policy Framework.
