2019/1564/T	Sash Tusa	16/04/2019 20:42:32	INT	<p>We have submitted this application with sadness and regret: this was the tree in which I had my first swing and tree house as a child nearly 50 years ago and, more recently, we have enjoyed both its aesthetics and conservation value. It is only the intensifying internal rot, and the fact that the largest of the three remaining limbs stopped producing any leaves last year that has persuaded us to apply to have it felled.</p> <p>We are committed to planting a native hardwood in its place, to retain the presence of large trees in this area.</p>
