2019/1226/P	Maureen and Phil Turner	16/04/2019 10:12:19	AMEND	<p>We object to the proposed new building because of its height which will have an adverse effect on the aspect from our garden and house in that the rear of the proposed building will be a blank brick wall rising to an apex well above the fence and hedge dividing our garden from that of 31 Minster Road. The current garage is not visible from our garden or the ground floor of our house and we have suggested to Mr and Mrs Griffin, the owners of no. 31 that a simple and acceptable solution to the problem would be to amend the present proposal so that the delineation of the roof remains as it is with the current building, which would not affect the internal layout of the new building. We have not yet (16.4.19) received a response from Mr and Mrs Griffin and/or their architect and therefore feel we have to formally object to the proposal since the closing date for comments is 20.4.19.</p> <p>We should add that apart from the issue of the height of the building we have no other objections to the proposal.</p> <p>We would ask to be notified of the date of the committee meeting which will consider the proposal.</p>
