101 General Arrangement Construction Notes:

- It is the contractors responsibility to ensure that all elements of the project build are installed as per the layouts, designs and details within this and the accompanying drawing pack including all relevant specialist contractors drawings. Any site variations or technical restrictions preventing this must be highlighted to RML Architecture or Paul UK as a matter of urgency prior to relevant works commencing. Refer to the RML Architecture drawing issue register for the full list of RML Architecture drawings within this projects drawing pack.

- The contractor shall note that all drawings have been prepared from digital survey details or 'as existing' drawings provided by others and as such accuracy cannot be assumed. It is the main contractor's responsibility to perform all necessary checks to ensure accuracy of construction drawings and actual construction.

- Approval of any variations or design changes to be made by Paul UK in writing. Any changes made without the express authorisation of the Paul UK Design Team will be deemed to be errors and should be rectified without cost to Paul UK. In all instances, if in doubt ask for clarification.

- All specialist and main contractor construction drawings require written approval by the Paul UK design team prior to procurement / installation.
