

GROUND FLOOR  
EVOLVING SIGNIFICANCE PLAN

- Very High
- High
- Medium
- Low
- Neutral
- Detrimental

- A These more secondary elevations are of lower significance due to their not being on principal streets or containing a main entrance.
- B Whilst the individual partitions in the purple-lined area are of neutral value, collectively they are detrimental as they have changed the character and reduced the legibility in this area.
- C These cellular offices have a lower level of change than those elsewhere at this level
- D A high degree of change has taken place in these office, including the insertion of modern partitions
- E These backstage and green room areas are directly connected in their use to the assembly room and are therefore of medium significance
- F The entrance sequence from Bidborough Street into the assembly room is of high significance due to its historic interior finishes and connection with the assembly room.

This plan is not to scale
