Dear John,
The change may be minor but it is an intrusive,
Cumbersome addition, so my comments stand.
Regards,
Eldred Evans.

Dear Eldred,

Apologies for the delayed response but I just wanted to clarify the extent of works proposed under this application and to double check whether the CAAC wanted to submit any further comments to this end.

Back in 2012, permission was granted at this site for the erection of a two storey garden pool house. Since then the permission has been materially implemented and therefore remains extant. This planning application essentially seeks a minor variation to the previously approved scheme to include an additional side wing to house a stair and new GF side window only. Other than these changes the outbuilding would remain as was previously approved.

The submitted plans are all drawn at 1:100 scale, should you need any specific measurements and do not have access to a digital scale please let me know and I can provide.

Kind regards,

John Diver
