

## Hydro-Valve Installation Instructions

### Installation Instructions For Small Mounting Box In Ø1.05m / Ø1.2m / Ø1.35m / Ø1.5m Circular Manhole Chambers

#### Step 1

Cut a hole in the circular manhole to allow the inlet and outlet pipes through at the correct invert level.

Figure 1 - Step 1 & 2

#### Step 2

Install the inlet and outlet pipes at the correct invert level. Grout around the pipes and finish outlet pipe flush with inside of manhole.

#### Step 3

Mount the Hydro-Valve on the inside wall of the manhole up against the outlet pipe. Ensure outlet invert level is the same as invert mark on Hydro-Valve. Ensure Hydro-Valve is horizontally level to achieve a good seal with the manhole.

Figure 2 - Step 3 & 4

#### Step 4

Drill the manhole through the 6 holes in the Hydro-Valve.

#### Step 5

Fix the Hydro-Valve to the manhole with the steel stud anchors supplied. Tighten bolts until the neoprene gasket is fully compressed to achieve a watertight seal between Hydro-Valve and manhole wall.

#### Step 6

Fix the first by-pass cord bracket to the underside of the manhole cover vertically above the bypass plate.

#### Step 7

Fix the second by-pass cord bracket to the underside of the manhole cover adjacent to the access opening.

#### Step 8

Ensure the by-pass cord bracket operates freely and is accessible from the ground.

#### Optional Overflow

A high level overflow can be incorporated by piping into the outlet from inside the manhole at the top water level.

Figure 3 - Optional Overflow
