2019/0882/P	edward williams	17/05/2019 13:01:46	OBJ	<p>I strongly object to this application with respect to the substation.</p> <p>This substation has been approved by Camden planners who have paid no respect to the street scape of Gloucester Avenue and the relationship between the two existing buldings.</p> <p>The drawings showing this have changed their numbering system so that it is difficult to trace the numerous revision to the plans. This appears to be a deliberate attempt by the developers to confuse not only the planners but the local residents.</p> <p>There is no need to change a drawing number and delete the reference to all previous changes.</p> <p>The substation now appears to be some 500mm higher than the current site gates and is thus an eyesore.</p> <p>There are no elevations of this building, no sections, no roof plan and no indication of materials in any of the submitted drawings.</p> <p>Previous applications called this extension a meter housing. Now, all of a sudden it is a substation.</p> <p>If a substation was required it should have been part of the first planning application and allowed for within the site.</p> <p>I request that this application is rejected and complete details of the sub station requested.</p>
