

<b>Application No:</b>	<b>Consultees Name:</b>	<b>Received:</b>	<b>Comment:</b>	<b>Response:</b>
2019/2204/P	John Myers	21/05/2019 06:51:26	SUPNOT	I strongly support this application. The proposals cause least harm in historic building terms, and there is no loss of historic fabric. All the proposals are reversible and will be removed on completion of HS2's construction works. The noise insulation is necessary to ensure the reasonable habitability of the building.
2019/2204/P	John Myers	21/05/2019 06:51:21	SUPNOT	I strongly support this application. The proposals cause least harm in historic building terms, and there is no loss of historic fabric. All the proposals are reversible and will be removed on completion of HS2's construction works. The noise insulation is necessary to ensure the reasonable habitability of the building.
2019/2204/P	John Myers	21/05/2019 06:51:17	SUPNOT	I strongly support this application. The proposals cause least harm in historic building terms, and there is no loss of historic fabric. All the proposals are reversible and will be removed on completion of HS2's construction works. The noise insulation is necessary to ensure the reasonable habitability of the building.
2019/2204/P	John Myers	21/05/2019 06:51:19	SUPNOT	I strongly support this application. The proposals cause least harm in historic building terms, and there is no loss of historic fabric. All the proposals are reversible and will be removed on completion of HS2's construction works. The noise insulation is necessary to ensure the reasonable habitability of the building.
