FAO Ben Farrant, Camden Planning

Dear Mr Farrant,

I have studied the documents and drawings relating to the proposed ground floor extension at 9 Pilgrim's lane. I find it to be a sensible and subtle addition to the existing family home, which does not impair the historic facade. By updating the property in this way, its current residents can enjoy a better connection to the garden. The fact that the adjacent property already has a larger rear extension (which surely dates from recent years) demonstrates the value of this.

kind regards
