Re: 8/9 Spring Place, London, NW5 3ER

Dear Miss Watson,

This is to confirm that my lift engineers occupied the ground floor units of the above property from around the end of July 2014 until the beginning of June 2016. They alternated their occupation, together with some of my family members, but a permanent presence was maintained during this time in order to help the owner who was concerned that squatters may return.

A building company also had some workers residing at the property on the upper floors during that same period.

I would be happy to swear an affidavit if that would be helpful.

Kind Regards

Waldemar Kucinski  
Lift Engineer, Owner
