**CATEGORY AND DEFINITION**

**Trees unsuitable for retention**

Category U Those in such condition that they cannot realistically be retained as living trees in the current land use for longer than 10 years

**Trees to be considered for retention**

Category A Trees of high quality with an estimated remaining life expectancy of at least 40 years

Category B Trees of moderate quality with an estimated remaining life expectancy of at least 20 years

Category C Trees of low quality with an estimated remaining life expectancy of at least 10 years, or young trees with a stem diameter below 150mm

**NOTE:**

Hayden's Arboricultural Consultants were not provided with a Topographical Survey or Base Plan showing the positions of the trees/landscape features on this site, so their locations have been fixed using GPS. As such the position of the trees/landscape features should not be taken as exact but gives a fair distribution of their locations on site.

**Method Statement Flow Chart**

**Pre Development**

1 Pre Commencement Site Meeting

2 Install BarkSavers  
**Critical Monitoring Point**

**Demolition**

3 Demolition of Existing Structures  
**Critical Monitoring Point**

4 Removal of earth as per 4.3.2 of the report

5 Install Ground Protection  
**Critical Monitoring Point**

**Construction**

6 Main Phase of Construction

7 Install 'No Dig' Surfacing  
**Critical Monitoring Point**

**Post-Development/Completion**

8 Undertake Planting/Landscaping

9 Remove Protective Ground Protection/BarkSavers  
**Critical Monitoring Point**

10 Post Development Tree Survey

**Project Completion**
