Dear Planning Officer,

Objection to any works being carried out:

without comprehensive external sheeting to help contain debris and waste within the building e.g. scaffold sheeting must be used;
where the use of diesel (or petrol) generators (and/or vehicles) supplying energy to the site is not prohibited e.g. electricity should be used and
where the heating of substances e.g. asphalt (bitumen) on the highway (and/or in the garden) without a correctly fitted lid on the container is not prohibited.

Kind regards,

[REDACTED]
