2019/2223/L	Helen Bryan	12/06/2019 11:18:10	COMMENT	<p>██████████ application site and are well acquainted with the devastating impact ██████████ next door to the application site and are well acquainted with the devastating impacts of noise, dust, and disruption- identified in the Environmental Statement SES - that will be generated both by the HS2 construction in the railway cutting twenty metres away and from associated HS2 works immediately outside many of the properties in Park Village East.</p> <p>We have lived next to the application site for forty years. We know that noise in front of 28 Park Village East bounces off the tall brick rear wall and large brick and concrete car park building of Albany Street Barracks and back into the rear and side facades of 28 PVE and the rest, creating a 'surround sound' effect. 28 Park Village East, and most other properties on the street, will be affected by noise blight at estimated AVERAGE levels of 90 dcb, which, since this is an average, is clearly anticipated by HS2 to be much higher at times. That level of noise is unendurable and unhealthy for adults but there are also many children in the street who will be, if anything, even more adversely affected. Therefore, noise insulation is needed on ALL facades of ALL affected properties, and these applications necessarily address that. HS2's noise insulation contractors continue to ignore the 'surround sound' impact.</p> <p>The application for Listed Building Consent and Planning Permission should be granted in full. These Grade II* Listed Nash buildings on Park Village East are very difficult to insulate against noise, effectively or at all without damaging internal historic features and the applicants have taken pains to ensure both that the application scheme is as sensitive as possible to the fabric and features of this Listed house, as well as effective against intolerable noise levels. The scheme for exterior secondary glazing is particularly acceptable as</p>
