**Attachments:** 144 Mill Lane- Proposed tree 001.jpg

Dear John.

Following our conversation, please find attached a site plan showing the two lime trees to be removed and replaced with one no. wild cherry (*Prunus avium*) as suggested.

It was agreed that the new tree would be planted the first planting season after the works are completed on site.

I trust that this condition can be amended and signed off now.

In the meantime, I have sent you photos of the timber cladding we propose to use.

Thank you for your help. Much appreciated.

Regards

Jeremy
