Mr Habib Neshat  
Planning Officer  
London Borough of Camden  
Environment Department  
Camden Town Hall, Argill Street  
London WC2H 8ND

Dear Mr Neshat,

**Re: Application PW9802935 at No. 6 Templewood Avenue NW3**

Our objections to the above development are as follows:

**1. Interruption of the line of existing buildings on Templewood Avenue**

As shown, on the drawing sketch enclosed, the proposed conservatory does infringe on the alignment of buildings on Templewood Avenue, and will detract from the uniform character of buildings on this unique road in Hampstead.

**2. Setting a precedence and position of the conservatory**

Approval of the proposed scheme would set precedence for similar alterations to other buildings on this road. Particularly because of the position of such an extension which overlooks the road side instead of being on the Garden side as usually is the case. Thus approval for such an extension will indirectly create a right for others to follow along a similar path which would not be beneficial for the enhancement of a Conservation area.

**2. Roof terrace**

The development would create a potential roof terrace for the first floor although most of it is glazed. We are concerned also about the look of the roof, which is seen by most neighbors on floors above ground level.

Yours sincerely
