2019/2785/T	Nicholas Lawn	20/06/2019 23:09:27	OBJ	<p>The trees which it is proposed to fell are a natural habitat for wide variety of urban wildlife including squirrels and a wide variety of birds. Felling these trees will destroy their natural habitat. It will also substantially change the character of the area which at present is an urban oasis.</p> <p>In any event, if the applicant had proposed to fell these trees it should have included its application within its wider application for redevelopment of the site. The Applicant should not be permitted to change the basis upon which its prior permission was sought and the Council should consider reopening the earlier decision if the applicant now wishes to amend its development. This creeping development is unacceptable and has obviously been designed to broaden the scope of the development by way of piecemeal applications.</p>
2019/2785/T	Amel Fenghour	20/06/2019 22:46:28	OBJ	<p>Cutting down the trees would have a negative impact on (i) local wildlife (ii) local environment, air, noise levels (iii) local residents (iv) myself and family personally.</p> <ol style="list-style-type: none"> <li>1. The old and large trees provide a home to a significant number of local birds and animals including rare red squirrels. Felling older, larger trees has a bigger impact on local wildlife. Further, potential structural impact of felling the trees, and or possible soil impact/erosion.</li> <li>2. The trees clean the air and counteract local pollution, store carbon and release oxygen, and the wind in the trees provides a calming and soothing noise which muffles the sound of traffic.</li> <li>3. The trees are beautiful and provide a restful scene and add to local character. The trees provide privacy and improve quality of life for the many people living in flats opposite the large houses on Glenilla Road. Cutting the trees will negatively impact residents on the rear of BPG (i) during the building period and (ii) once the new buildings are in place.</li> <li>4. Our flat faces the trees and 30 Glenilla Road directly. We love the trees. The trees give us joy and are a calming influence. My daughter was born spent many hours as a tiny baby in 2018 looking out at the trees, seeing the sunlight through them and watching the wind move the leaves. We still sit by the window and look up at the tree and watch the birds perch and the squirrels climb. We do not have a garden but have still been able to enjoy something of nature because of the trees. 'Birdie' was one of my daughter's first and favourite words. It truly would be heart-breaking to see the beautiful tree cut down and would spoil a beautiful outlook.</li> </ol> <p>Finally, the trees were not part of the original planning application and this 2nd application offends natural justice. We did not object to the planning application at 30 Glenilla Road and the building next door because the trees were to remain in place. That application should be reopened if the trees are felled.</p>
2019/2785/T	Stephen Adshead	20/06/2019 16:24:11	OBJ	<p>The mature trees in the Belsize Park Gardens area provide a habitat for a range of bird species, including tawny owls and greater spotted woodpeckers which are relatively unusual in London's urban environment. The number of mature trees in the area has already been reduced. Only last week, a lime tree in Glenilla Road was felled. It would be detrimental to the wildlife of the area to allow further, unnecessary destruction of mature trees.</p>
2019/2785/T	Dr Nick Shepley	20/06/2019 15:16:20	OBJ	<p>I OBJECT to the proposed removal of the two sycamore trees in the strongest possible manner. They are beautiful, venerable trees that add to the peace, leafiness and beauty of this conservation area, which should protect and conserve trees that are almost 200 years old. Furthermore these sycamores enhance the area and can be seen both from Belsize Park Gardens, where they are clearly visible from the road, as from Glenilla Road behind us. In addition the trees help the wildlife, they create a calm habitat and are, I believe, a part of a former avenue, the heritage of which should not be lost. There are two more sycamores next to them. We must stand up for our environment and this act of cutting trees down is selfish and short-termist.</p>

2019/2785/T	Miss Susan Morgan	20/06/2019 11:12:52	OBJ	I OBJECT to the proposed removal of the two sycamore trees in the strongest possible manner. They are beautiful, venerable trees that add to the peace, leafiness and beauty of or this conservation area-which should, as the name implies, protect this special environment. Furthermore they enhance the area and can be seen both from Belsize Park Gardens, where they are clearly visible from the road as from Glenilla Road behind us. In addition the trees help the wildlife, atmosphere and are I believe a part of a former avenue. There are two more sycamores next to them.
