Your Ref: 2019/3060/T

This application is to fell a "Cherry" in the back garden of 11 Gloucester Crescent. It presumably refers to the *Prunus Autumnalis* in that garden. It has been there since before we moved [REDACTED] over 22 years ago. This tree is rather misshapen, and does need pruning, but it is not a large tree and is an asset to the back gardens, having beautiful blossom throughout the winter. The case for felling it may come from Christo, the neighbouring office in Parkway who may believe that it is a danger to their building. This is most certainly not the case, as the back wall of their office was underpinned to a depth of 2.5 metres a few years ago, which means that according to the NHBC guidelines the tree poses no threat. We would definitely object to the tree being felled.
