2019/3253/T	Mrs Lesley and Arthur Miller	01/07/2019 15:33:50	COMMNT	<p>This tree in our garden has grown absolutely enormous, entirely overshadowing the back half of our small garden and partially overshadowing our neighbours' gardens too, on both sides. The roots are also growing huge and pushing up the concrete blocks underneath the gravel which carpets the back of the garden, making them a bit of a hazard; you could easily trip over them. They're also threatening to undermine the shed which is right next to the tree and ultimately the house itself. We would much like to have it removed to give much needed light to ourselves and our neighbours. The tree is not visible from the road and its removal will not affect the appearance of the road. We hope all is in order and that you will approve this request. I have also e mailed you this comment.</p>
