2019/2263/P	Y Yang	07/07/2019 13:18:11	OBJ	<p>The site lies within a Conservation Area. It is part of a woodland which is rare in the area now, it deserves to be looked after. Trees and the space for wild animals in the site area form a eco-system that protects the neighbourhood from the heavy traffic pollutions of the nearby roads.</p> <p>There is no access to utilities. Passenger and car access is very limited. The site is not suitable for any residential development.</p> <p>We strongly object to this application.</p>
