2019/2475/P	Phebe Robinow	06/07/2019 18:24:38	COMMNT	<p>I have been alerted to this application (re-application) by colleagues living in Somers Town. Please accept my objection to the plan as it now stands.</p> <p>It seems very odd that, though the Council seemed to understand that the original plan would need it's own electricity substation, this was not catered for and the Council did not refuse the application until it had been included in the plans. As the Somers Town residents have pointed out, changing a large heavy building which has tall pillars which enable the views and feeling of openness of the public area to be kept to a solid building is a major amendment, not a minor amendment. It seems extraordinary that, apparently, no effort has been made to assess the impact of the noise and vibration on the neighbourhood of this substation. Why has the Council appeared to have learned no lessons from the farrago which is HS2?</p>
