2019/2860/P	Sanya Polescuk on behalf of Belsize Society	06/07/2019 15:51:47	OBJ	The loss of the half of property's typical front garden and its substantial soft landscaping, originally created in order to soften the effect of the large and otherwise imposing building on the street, is regrettable and should be resisted. It is contrary to Camden's design guidelines to support large areas of hard landscaping in the residential developments. Finally, the proposal to create an extensive private parking area in the Borough which otherwise works hard to reduce its residents' reliance on cars should be resisted.
