Subject: Brill Place Tower

Increased footprint

this would massively increase the footprint of the tower, taking up more space in the park "Plot 7: 54no. residential units over flexible A1/A2/A3/D1 floorspace at ground level (approximately 70sq.m)" and the current planning application requests "inclusion of 24sqm (GEA) substation at ground level resulting in an increase in footprint area of 31sqm." Not acceptable for planning to increase in this way as even more precious green space would disappear from an area that is already disproportionately short of GREEN space Sincerely Mary Wood
