Subject: Old-ish photos of wildwood

Dear Gary -

I found the following pictures online of WWG. in particular they show 10&11 just before it was sold and the current owner started all of the work.

You can clearly see what it was like BEFORE and the way in which the 9 houses before this one as all beautifully planted with raised beds too

i think this shows an interesting juxtaposition against the pictures the current owner has sent including the two houses on the other side, which are not indicative of the whole street in any way

I hope you can take this into consideration with regard to the current new (retrospective) planning application

thank you

ponse
