2019/2591/P	Wayne Glaze	10/07/2019 12:34:24	OBJ	<p>I am writing to object to this planning application as i believe the proposed works are not necessary and that simple maintenance of the existing rainwater goods is required. I believe the proposed works would impact upon the character of the listed building.</p> <p>To assist the LPA i have commissioned a report from a firm of Chartered Building Surveyors Ward Williams Associates which confirms my observation . I have sent a copy of WWA report dated the 4th July 2019 by post to the case officer as it appears i am unable to attach it using your website.</p> <p>In summary the WWA report confirms that the proposed works are not required and that the works would negatively impact upon the character of the listed building and adjoining terrace of listed buildings. At present all the Rainwater goods on the rear of the terrace are uniformed and the same . This application seeks to change that .</p> <p>As the resident of the ground and lower ground dwelling in this property i have experienced over 6 years of water ingress into my home due to the lack of maintenance by the freeholder . The existing rainwater hopper is prone to be blocked by leaves . The freeholder's response after 6 years is to try and install a larger down pipe for the rainwater . Clearly this too will need maintenance .</p>
