Response:

We write with reference to application 2019/3138/P at 115-119 Camden High Street

We have 2 main comments:

The increased height and massing of the new development up to the boundary with ourselves, will block out daylight from our 2 rooflights, vital to the daylighting of our deep-plan offices. The increased height will also impact all of our rear doors and windows and external terrace which is not covered or drawn out in the application.

Secondly, we request detail and accurate depiction of the junction with the shared boundary at the rear of our offices. We would request more information showing the boundary wall condition, our fire escape stair and associated fences and gates and request more detail and an elevation of the party wall. We would also request clarity on how the new boundary will be constructed and how our fire escape will be maintained throughout.
