2019/3507/L	CTCAAC	16/07/2019 16:34:23	SUPPRT	We support this pragmatic and sensitively designed application for mechanical ventilation, in the specific circumstances of HS2's forthcoming noisy construction works. We are pleased to see that the cast iron flush mounted grille will be aligned, if possible with other similar openings, and be painted to match the surrounding render. We note from the DAS / HS that should the grille be mounted in brick it will be painted black. We assume that it will be removed on completion of the works.
