REPLY TO: London.

= St. Pancras =

Dear Sir,

Dejongs Premises, 84 Albert Street, Camden Town.
Case No: T.P.37666.

Further to our application of the 16th May, 1947, and your Councils consent on 8th August, 1947, we would be obliged if you would arrange for the enclosed application to be given consideration.

We have ourselves, and so have our Clients, made every possible endeavour with the Ministry of Works to obtain a licence for the erection of the proposed structure, but as you are no doubt aware, it is only on the most essential work that the use of steel will now be authorised.

Our Clients are carrying out contracts of utmost urgency, in connection with the schools programme of the Hertford County Council, and it is for this reason that the space is so necessary. However, education does not rank high in the priority list with the Ministry at present.

As an alternative therefore, and as a temporary measure, our Clients wish to erect a structure over that portion of the land, coloured pink on plan, to provide storage space. We would mention in this connection that the site although now cleared, was before the air raid damage, a two storey building used as a furniture depository.

Will you therefore, please consider our request at the earliest possible moment and we would mention in conclusion, that this is an application in principle for the use of adjoining land for a limited period only. We shall of course submit proposals for the structure in due course.

Yours faithfully,

[redacted]

Superintending Architect,
London County Council,
County Hall,
Westminster, S.W.1.
