Hello,

You have missed out these photos, attached, that show the 40 year old mature trees in a row right outside the polluted flats, that would subsequently be missing because of the plans for concrete paths there instead.

(I have deleted the two photos that I saw were already included with the comments.)

Thank you

Michelle

Ps Here are some photos of the park, and showing the 40 year old tees, especially those aligned with the severely polluted/ pollution threatened estate.

It seems in the pictures that these are planned to be concreted over (for access to the flats planned towards the back of the park).
