**Subject:** Application 2019/3523/T

We wish to object to this application. The felling of any trees should be resisted whenever there is no compelling reason for doing so. In this instance, the proposal that trees should be felled to prevent anti-social behaviour is unacceptable. Reducing them is acceptable when they cause loss of light, but anti-social behaviour in that area should be dealt with by securing the site more effectively, not by destroying trees.

We therefore urge that this application should be refused.
