

NOTES:  
 This document and its design content is copyright © it shall be read in conjunction with all other associated project information including models, specifications, schedules and related consultants documents. Do not scale from documents. All dimensions to be checked on site. Immediately report any discrepancies, errors or omissions on this document to the Originator. If in doubt ASK.

**Method**

Currently the local authority collect waste via the existing vehicular access towards the west of the site. A keypad and access code is currently used and this will be replicated on the new pedestrian gate. The new bin store in connection with the new development is located towards the south east corner of the site and is easily accessible from Maygrove Road. The approximate distance to the new bin store to the road is 9m.

The bin store is constructed of 1.6m high walls with brick to match the new development and there will be a sliding wooden access gate with a minimum width of 1830mm. A gully is also provided to ensure the bin store can be washed down regularly as part of the maintenance strategy.
