Dear Mr Fowler,

Re: planning application 2019/2475/P: Brill Place Tower

I would like to object to the above planning application. At a time when the Council has declared a climate emergency, it seems incredible that it is to continue with a scheme that will mean the loss of mature trees and green space, and the worsening of air pollution in Somers Town.

The application is to house an electric substation. At the time the consented scheme went to planning it was known to need a substation. No provision was made in the original application, suggesting a cynical manipulation of the planning system.

I object on the following grounds:

- Increase of 14 per cent in the building's footprint
 - Loss of transparency
 - Loss of private open space
 - Impact on public open space
 - Inactive frontage on Brill Place
 - Loss of passive surveillance
 - Introduction of noise and vibration into the open space
 - Inadequate noise assessment
-

Regards,

Signed
