2019/3231/P	Jane Barclay	26/07/2019 17:55:52	OBJ	<p>I am a neighbour in the terrace and I have some concerns about these plans.</p> <p>They have removed most of the bin storage area and these plans do not allow sufficient bin storage for 2 separate dwellings which will result in bins and general household waste being left on the street. The former would be an obstacle and the latter is a major risk for foxes and a health hazard.</p> <p>We had hoped that any work to this listed building would include restoring the back elevation to its initial design to bring it in line with the rest of the terrace. Currently, there is total symmetry with the exception of number 86. This is quite an eyesore and is visible not only from the terrace and the gardens but also from the Heath. Given the terrace's recent listing we would have expected this to be a major priority.</p> <p>Lastly, number 86 recently moved their gas meter from the inside of the property to the middle of the front elevation - again, a very unsightly addition and one which I believe was carried out after the terrace was listed.</p>
