Subject: Police station in Hampstead junction Thurlow Rd.

Dear Mr Fowler, I write to make an objection to the planning proposal for a school above. My objection is based on the fact that the proposal conflicts with so many of the council's own policies against granting a permission. Not only has the application already been turned down once and is costing all ratepayers/residents unnecessary hard-earned wasted costs.

It is totally inappropriate for a school where local children are not able to go to is a complete nonsense. (catchment area) The utter drivel that parents are going to walk their children to school from a different area Beggars belief - just wait until a cold or rainy day - and see the problems the council will have created (worse than old street roundabout) cars blocking, turning, backing against traffic, turning in others' drives (chaos) I can say from first-hand knowledge (new school west Heath road) the noise, parking, upheaval, daily deliveries, staff, children's movements, coaches, buses, to and from activities, football, swimming outings in the centre of Hampstead is totally inappropriate. To boot there are insufficient numbers of children to fill a school from professional consultations undertaken on so many planning points including noise just does not justify a standard of obtaining a permission.

ALL in all a terrible idea in an entirely wrong position and could put young persons at a terrible risk - from traffic, pollution as is expressed in the environmental studies submitted.

Yours truly

Stuart Katz MRICS
