**Subject:** Application 2019/2033/P

Dear Sirs

I am a member of the Belsize Society. We object to this application for an air conditioning unit for the following reasons.

1. It will be located on a raised roof and will be visually unacceptable impacting the roof-scape.
2. The applicant makes a comparison to the photovoltaics used in an adjacent property. Solar energy is beneficial to the environment whereas the air conditioning is detrimental to the environment.
3. Noise will inevitably leak and impact close neighbours despite acoustic measures.

We ask that you refuse this application.

Best wishes  
Barrie Tankel FRICS
