I wish to comment on the two applications below to reduce the 6 trees. Unfortunately, because of a glitch in Camden's systems, the date given for comment per-dates the date of application, which is a difficulty for those of us without time travel.

I'm ok with these applications if it is planned ONLY to take the trees back to the current pollard position. But these are important trees, in important corner positions, and so they should not be lopped any further than that – to do so would be a danger to their health and a detriment to the Conservation Area.
