

Dear Camden Planners

As you may be aware, Save West Hampstead "Stop the Blocks!" coordinated the campaign against the proposed A2 Dominion development at 156 West End Lane, as well as the idea that Camden would sell off the last bit of publicly owned land in West Hampstead.

Our campaign was instrumental in organising well over a thousand individual and group objections to the original proposal.

It has come to our attention that CGL / A2 Dominion have submitted a new planning application for the site, registered as 2019/4140/P.

We note that Camden Council planners appear to have made no effort to contact the many hundreds of objectors, for whom we know Camden holds at least an email address and/or other contact information, in connection with the new application.

Given that the new proposal contains within many significant differences to original, we would have expected that Camden is obligated to notify these clearly interested parties of any and all changes, amendments or additions to the application.

As a result of Camden's failure to notify clearly interested parties, including SWH-STB with whom Camden planner had many interactions over the course of the original application, we request that the 'Comments Until' date of 16/09 is extended for a period of at least another three weeks beyond the point at which Camden notifies all residents who took the time to review and comment on the original application.

Please advise how long you believe it will take you to notify those interested parties who commented on the original application and what the new 'Comments Until' date is likely to be after it is extended to give local residents the opportunity to review the significant proposed changes to the original application.

Thanks,

Joseph, Bridget, Ian
