Dear Charles

2019/3256/P: Hampstead Parish Church

I am writing on behalf of The Church Row Association to object to the above application.

Due to its strength, the proposed lighting will adversely affect the setting of Hampstead Parish Church, a listed Grade I, and the surrounded listed tombs Grade II* and II including the Grade II cast iron lamp outside the East Entrance (Historic England Entry 1067354). The light output of the listed lamp is an integral feature of its listing.

The Church Row Association echos the comments of Hampstead Conservation Area Architectural Committee: *"HCAAC Objects to this proposal which amounts to gross overkill, detracting from the immediate locality and hence harming the CA... Some more appropriate and deliberately modest lighting might be acceptable but nothing should detract from the important 'landmark' lighting of the steeple which it is good to view closely as well as from the various Hampstead long views.*

Approval should not be granted.

Yours sincerely

David Milne
