2019/4444/P	Denise Murphy	22/09/2019 13:57:06	OBJ	I've been living on the Mayford estate for a number of years, i am suffer from severe anxiety and PTSD so i object to the change of use to a care home, as the noise from the care home would cause episodes of deep depression and triggers the PTSD as noise becomes all too much for me to cope with, i have already had to move from my previous home due to a young person with learning difficulties who caused constant noise and moved specifically moved to Mayford for the quiet, where the proposed gardens will be located it will overlook the communal gardens which are peaceful all day, also the bins being located outside the proposed care home will add to the vermin problem and disease.
2019/4444/P	Sharon Mathews	22/09/2019 14:18:24	OBJ	i have been a resident for 20 plus years my house backs directly onto to the communal gardens, over the years i have had to listen to screams and noise from the day centre, which was very stressful, now with the proposed change of use to a care home the noise will be 7 days a week. Also we have had garden fences that are at a low level where the communal garden and our own garden seem as one, raising the proposed day centre fences is not acceptable, the position of the air unit on roof is not acceptable either due to the potential for noise pollution, we already live on rat infested estate and the increased level of refuse will add to the infestation of rats.
2019/4444/P	Tina Plummer	22/09/2019 13:26:46	OBJ	I object to the change of use of the Mayford day centre to a residential care home as bedrooms will have windows that will overlook existing properties, raising of garden fences to an already institutional looking building, the installation of an air handling unit on a roof, the new bin location which will add to a vermin infestation problem on the Mayford estate, not enough green renewable energy in design. location of parking space for a van for transport less than 3 meters from property. The extreme change of use from day centre to care home which will cause a lot of noise 24/7 that was not there before, and extending and using up green space that has been there for 48 years.
