

Original plan has now changed with wooden shelter being removed not rotated 90 degrees.
 Garden will be in its place in top left hand corner of muga pitch.

Protected trees all left in situ

Canopy free standing structure so can be removed at any time.

Canopy lowered slightly to ensure it is not visible above fence and new privacy screen to be bought by school for Rev Alistair Tresidder's garden along railings.

Gravelled slope to be replaced by wooden decking with ramps for push chair and wheelchair access. Canopy to be made smaller to give more room for play space.

Muga pitch to have raised fencing to protect the windows of the church from balls and shaped in arches to reflect the arched windows. Planters removed as dangers step up to current metal fence with large drop behind. Wooden fence in front of current metal fence to ensure safety of the children, but so it can be removed at any time. Top of slide structure to reflect the shape of the tower on church.

New fence to protect Alistair's garden, but with gate to allow him access at any time.

Musical instruments and water wall only to be attached to new wall next to Alistair's garden replacing current attachments.
