Dear Thomas,

Tesco - Shelton and Endell Stret WC2
2019/3728/P

OBJECT

The Council must deny this application because installation of louvres on the ground floor would harm the character and appearance of the conservation area. The window must not be replaced by louvres, it must remain a window.

The shop will certainly be using either very large delivery lorries or more frequent smaller lorries which will clog up the areas narrow streets, causing extra pollution as well as dirt to be stirred up and cling to the walls of surrounding buildings.

If the application is granted Tesco must not be permitted to hang any illuminated signs.

I would also like to comment on the signage application too 2019/3741/A

Object

The signage is too large and brash for a Conservation Area, it must be possible to modify the design into something smaller and more in keeping with the area. Under no circumstances may the signage be illuminated.

Thanks so much,

Jo Hurford, BCAAC
