We write, as people living very close to Fitzroy Square, to express our concern at the prospect of two very important Adam houses in the square becoming a campus for an American university. The very large number of students envisaged and length of day - weekends as well as weekdays - at which they are likely to crowd the square alarms us. In particular we hope that they can be kept out of the gardens that frontagers enjoy at all times [as well as the public for limited times in summer], but wonder whether that can be enforced.

We have seen comments submitted by other residents criticising the proposal and entirely concur with them.

Yours faithfully,

D Keith Robinson
