I am a longstanding teacher at Netley Primary School . Our school is in one of the most polluted areas in London (see BBC London news 16.10.2019). As a school we are trying our best to improve the air quality for our children's health and future by installing air purifiers and plants within the school. Our children have the right to grow and develop as healthy young people. Our staff have the right to work in an environment that allows us to teach the children without putting our own health at risk.

As a member of staff at Netley Primary School and Centre for Autism, I am opposed to the granting of planning application 2019/47000/HS2 as it will seriously impinge on the smooth running of the school: create noise and pollution, reduce safe access and generally impinge on the ability of the school to maintain a safe environment for its pupils.
