Dear Ben,

This is to register my strong objection to the proposal to run up to 200 lorries past Netley School each day for 2 years.

Netley is already in an area blighted by high air pollution. As a community we have been doing everything we can to reduce the amount of air pollution our children and adults are exposed to.

It is simply not right that a proposal is now being made which would expose Netley's children, their families and staff to yet more pollution.

Please abandon this proposal and replace it with one which keeps these lorries as far away as possible from this communities schools, nurseries and homes.
