

# BUCKNALL STREET LOGISTICS

The partial road closure of Bucknall Street will form a pitlane and logistics area for our vehicles to access the site during the works. The road closure will be demarcated using water barriers and controlled by Traffic Marshals. Pedestrian footway (site side only) will be closed during our works to upkeep the safety of the public as this will be our main entry and exit locations for the works. Although a partial road closure is in place, public vehicles that require access to the residential underground car park or loading area (Google) on Bucknall Street will be provided access by our trained Traffic Marshals.

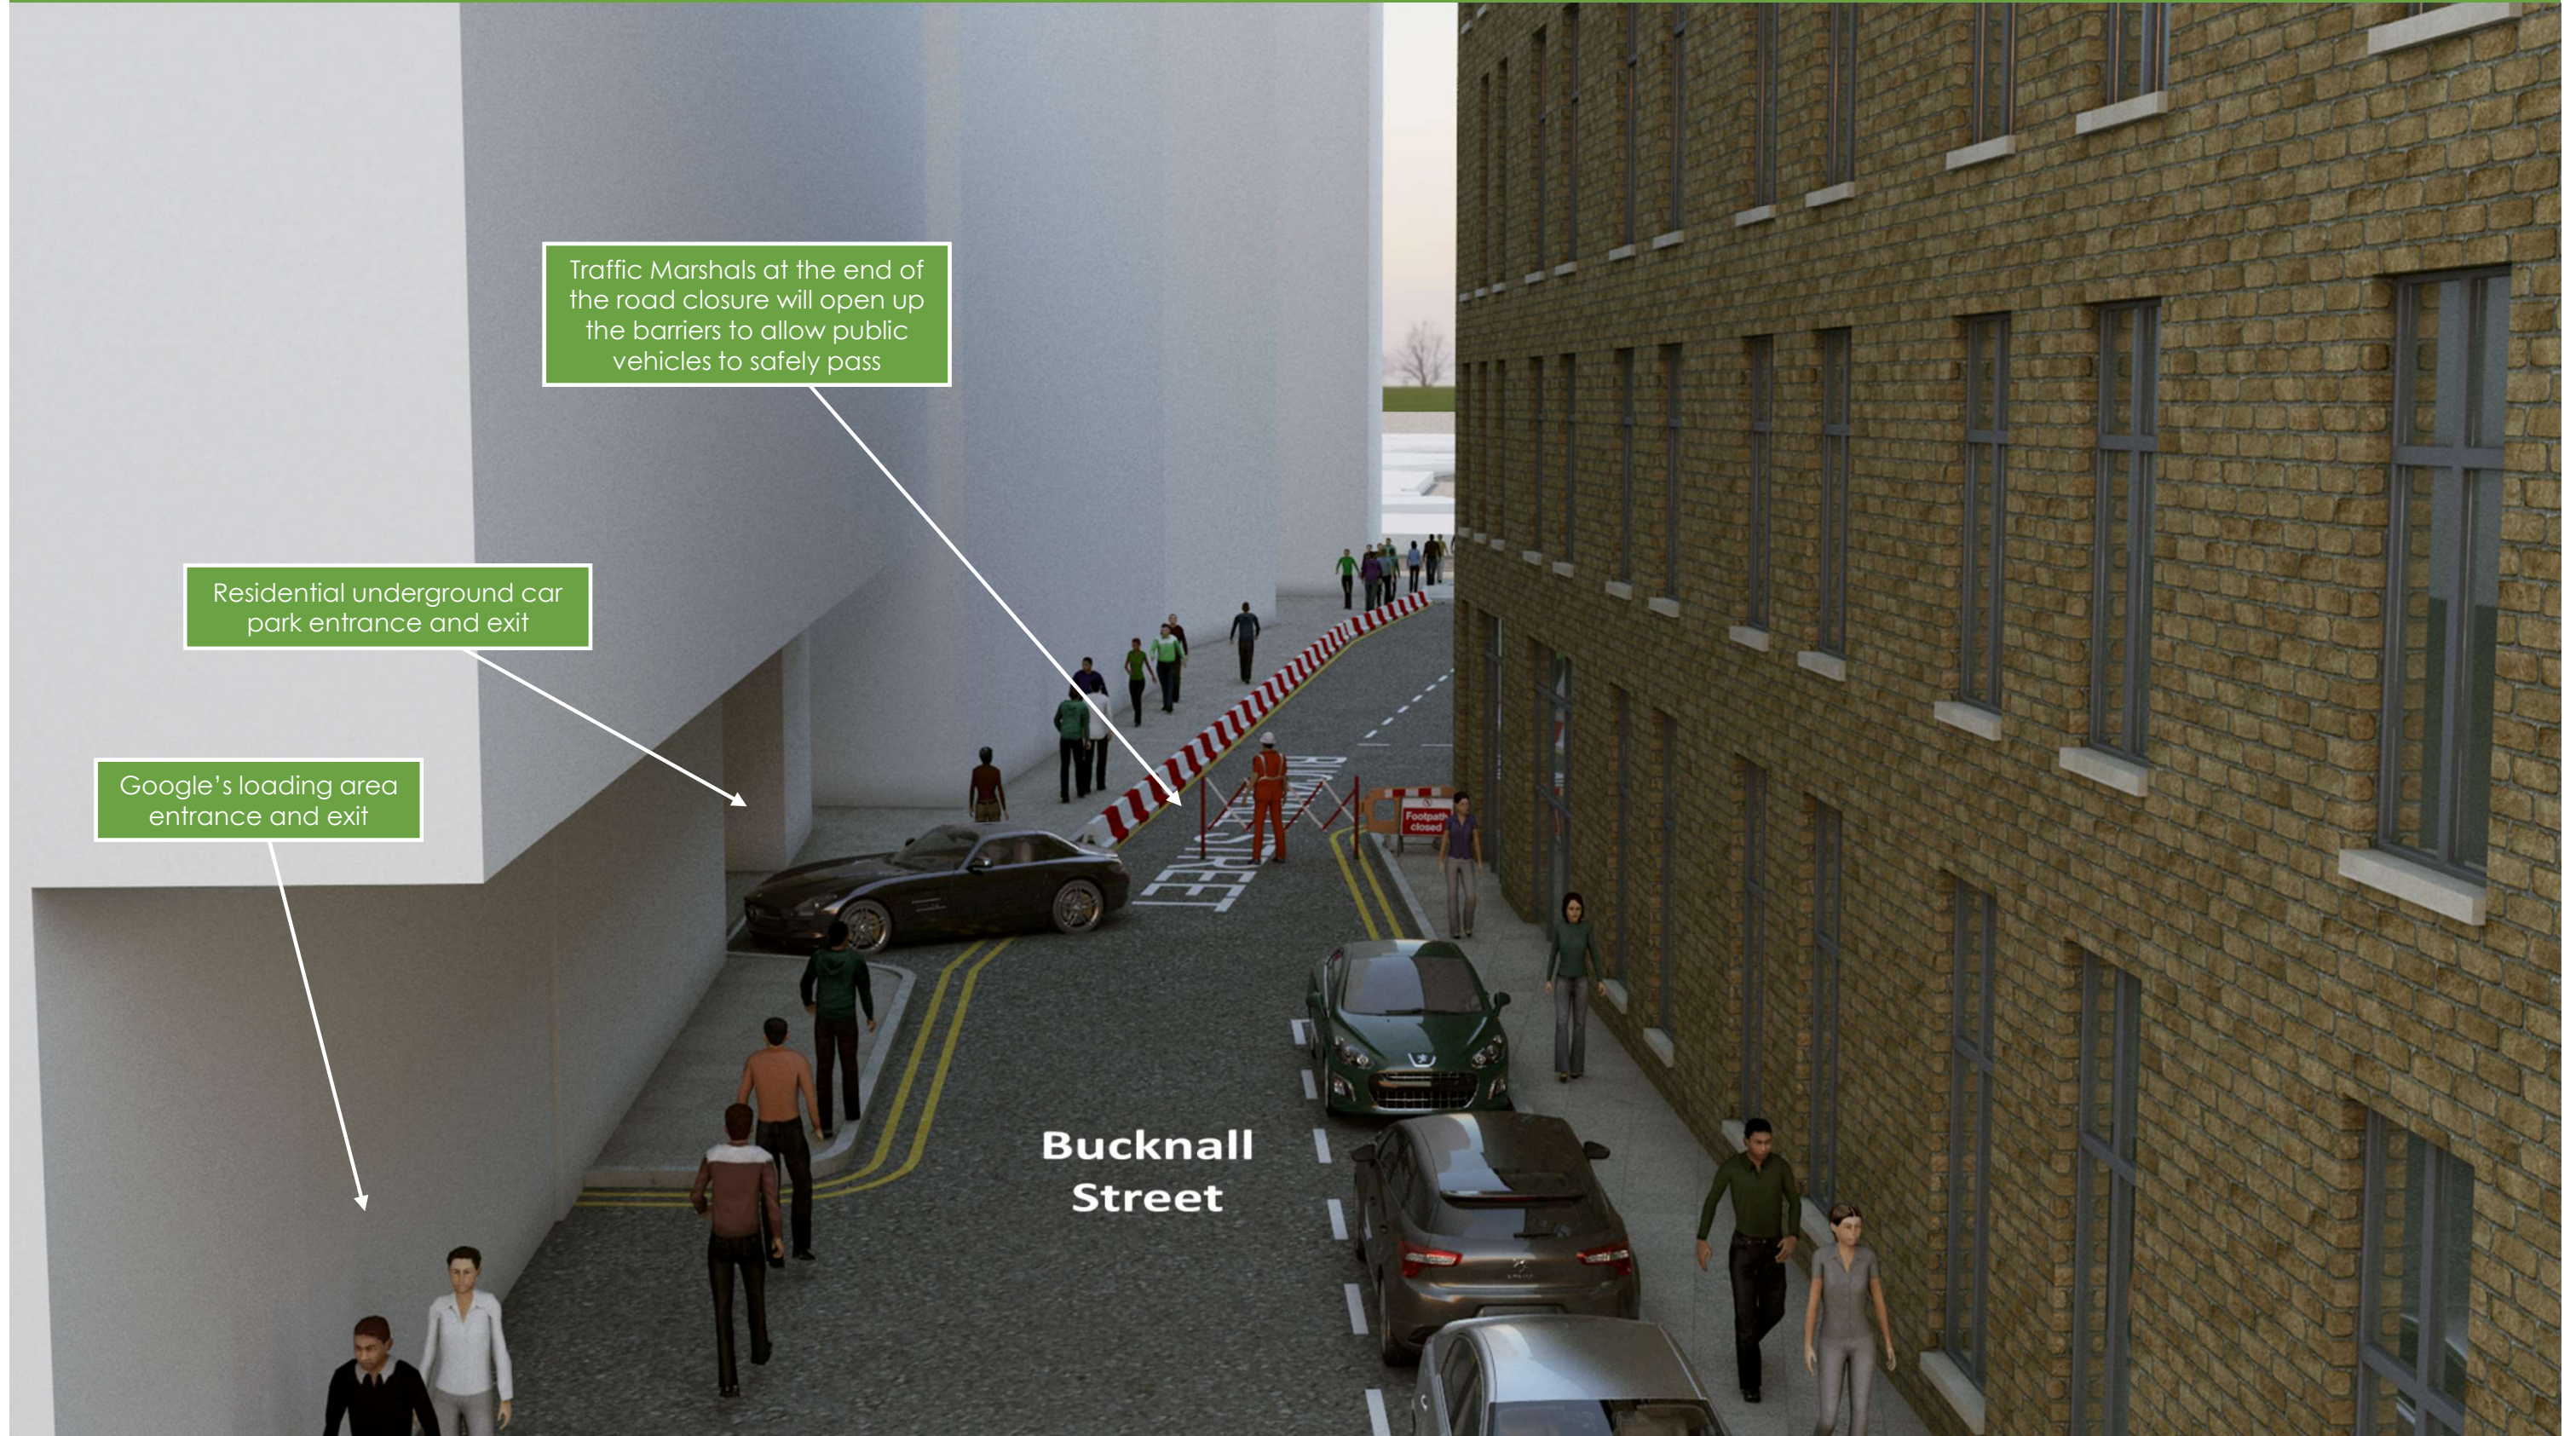

# PUBLIC VEHICLE ENTRY

Public vehicles that require the use of the residential underground car park and loading area (Google) on Bucknall Street will be provided access by our trained Traffic Marshals during our works. The vehicles will enter a waiting area while Traffic Marshals ensure the area is clear and safe for vehicle to drive through. Once confirmed, vehicles will be guided on to Bucknall Street.

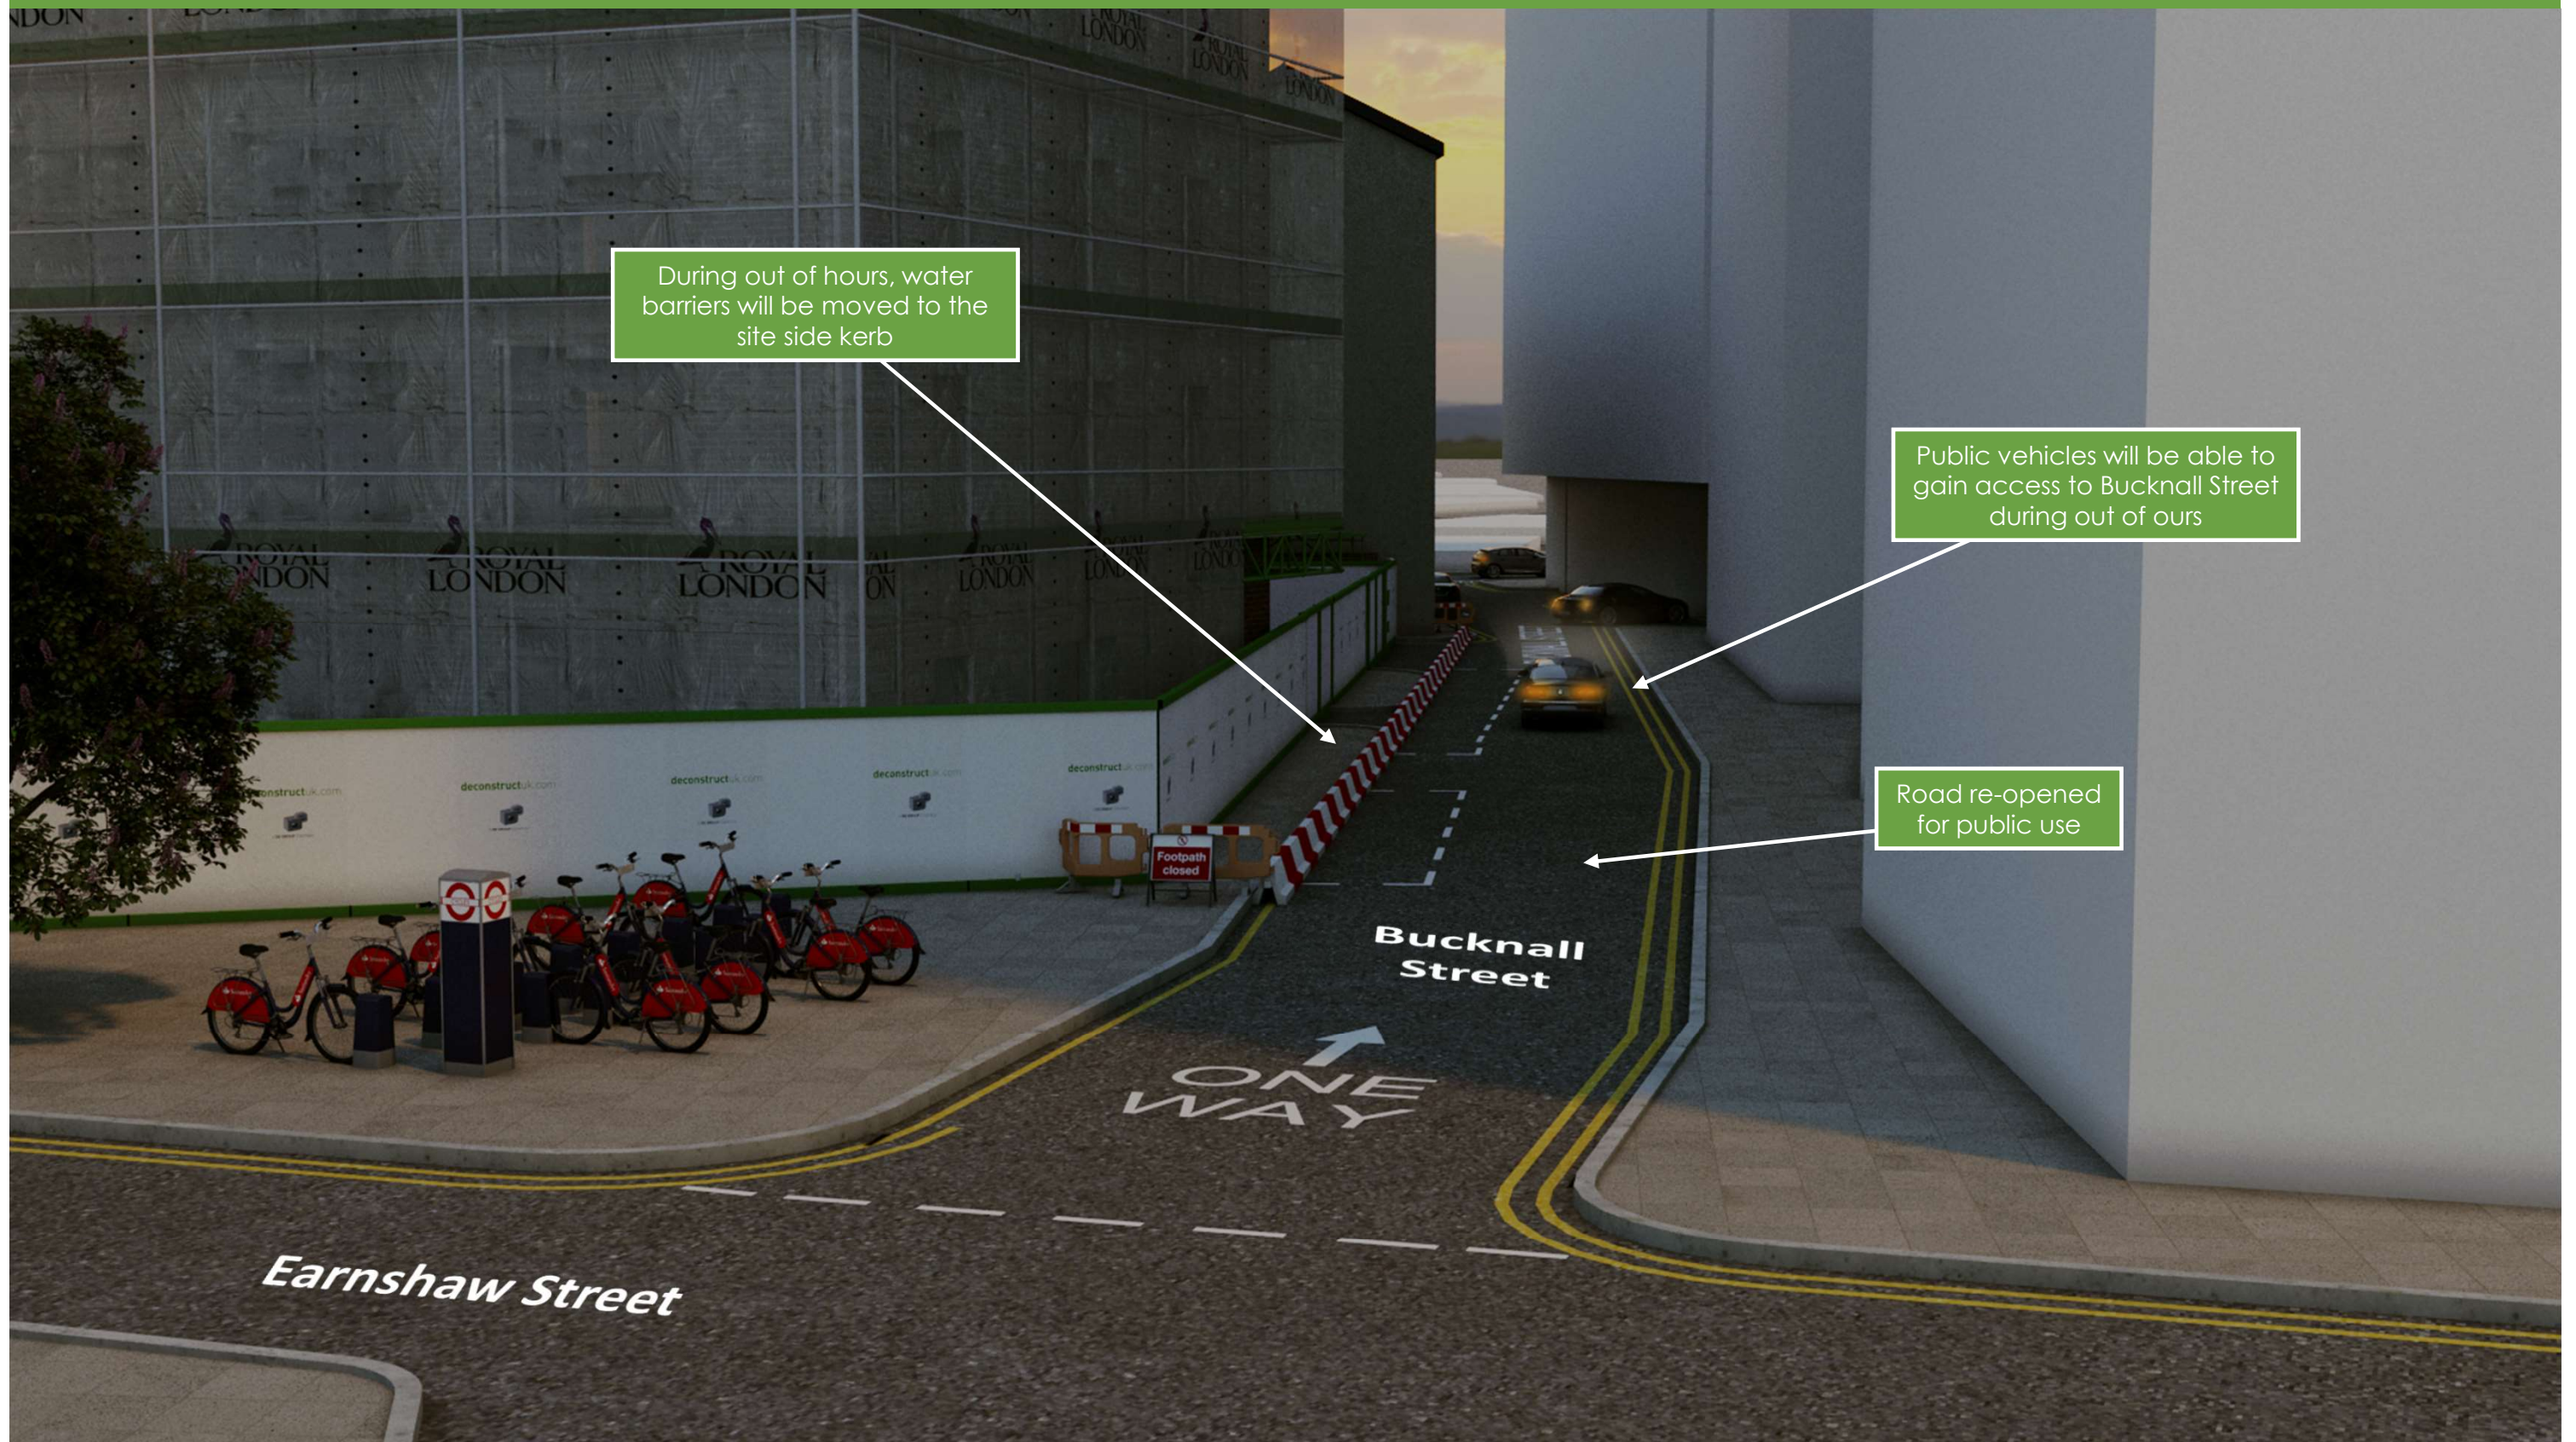

# PUBLIC VEHICLE EXIT

Public vehicles will be greeted by our Traffic Marshals at the exit location. The Traffic Marshal will open the barrier to allow vehicles to safely continue their journey.

## BUCKNALL STREET ACCESS (OUT OF HOURS)

As the site closes each day, the water barriers will be moved to the site side kerb of Bucknall Street to re-open Bucknall Street for public use.
